● Customers churned — Churn rate

Area type

Suburban (50k-100k)

Town (10k-50k)

Rural (<10k)

Urban (100k+)

Tenure stage churn

Key insight:

- . **Senior (65+)** customers churn at **42% despite paying \$80+/month** — highest across all segments.
- . **Customers with dependents** churn at only **3-5%**, confirming family structure as the strongest natural retention factor.
- . Critical window: **64.75%** churn occurs within **first 6 months**.

Customer Survival Curve by Contract Type

Key insight:

- **Predictive Signal: 18.36%** of active customers show elevated churn risk—**\$57,567/month** at stake if no action is taken within 30 days.
- The survival curve reveals a critical intervention window: **Month-to-Month** customers cross the **80%** minimum retention threshold at Month - to - Month of tenure — this is **the last viable point for contract conversion** before churn probability becomes irreversible.
- **Two Year** contracts maintain retention **above 90%** across all tenure stages — proving **the solution already exists** within the current product portfolio.
- **5.03% Critical + 13.34% High Risk** customers represent the highest-priority targets: act before churn score rises above detection threshold.

Connecting the dots across all chapters reveals three distinct at-risk profiles:

- **Senior 65+ on Fiber Optic without Tech Support** → Paying **\$80+/month** but churning at **42%**.
Fix: Default bundle **Security + Tech Support + dedicated senior support line**.
- **Single & Married-No-Kids on Month-to-Month in first 6 months** → The most critical finding:
• **Two Year** contract customers show **2.55% churn** in the same period vs **57.06% for Month-to-Month**.
Contract type — not tenure length — is the decisive retention factor. Even **36+ month Month-to-Month** customers still churn at **33.74%**.
• Fix: Automated contract upgrade campaign at **Month 2 + replace Offer E (52.92% churn) with Offer A (6.73% churn, 70 months avg tenure)**.
- **Suburban & Town customers facing competitor pressure** → **46.38% churn** driven by competitor offers, not price.
• Fix: **Geo-targeted proactive outreach + area-based support quality audit**.
